

CLAROS COLLECT

Accurate field data collection made simple

Hach®'s Claros Collect helps you make informed decisions faster by reducing data errors at the source of collection and providing instant data availability in WIMS.

Reduce data errors at the source of collection

Claros collect alerts you when entered values are invalid or outside of expected range, and allows entry of field observations for additional context. Be confident your data is accurate and complete.

Make informed decisions with instant data availability

No need to wait hours or days for paper to come back from the field; data entered on mobile devices is available in WIMS within minutes. As a decision maker, Claros Collect delivers the information you need when you need it.

Available anytime, anywhere, any device

Use a variety of devices, online or offline. Whether in remote locations, the lab, or while walking around the plant, Claros Collect enables authorized users to capture, share or access data.

Select the process for data entry

Visual Warnings: Invalid data entry

Validate data

Data available for review

Principle of Operation

Authorized users can input data on any device using a web browser or an iOS application. Data Collection forms are configured to match the processes and parameters in your operation.

Visual warnings and messages provide users immediate feedback on invalid values, improving data quality at the time and source of entry.

When Network access is not available, data is saved on your mobile device and is automatically transmitted when a network connection is established.

Using Claros Collect or WIMS, authorized users can view and analyze data entered by others.

Accurate field data collection, available to authorized users, anytime, anywhere, any device.

Requirements for Claros Collect

Mobile iOS

Download the app CLAROS COLLECT from the App store
Requires iOS 9.3.3 or greater

Mobile Android

Download the app CLAROS COLLECT from Google Play
Requires Android 4.4 or greater

Compatibility

Compatible with any mobile device with a supported web browser

Web Browsers

We support the current and the previous release of Google Chrome, Safari®, and Microsoft® Edge™ desktop browsers.

Water Information Management Solution (WIMS)

WIMS version 7.6.5 or later
